PROJECT TRANSFORMERS Child trafficking is significantly on the rise in Manila, but God is doing *great* things here. Our Filipino brothers and sisters are compassionate, joyful, humble, and deeply engaged in the fight to protect children. Some of the best Christian leaders in the world are in The Philippines—which is good, because **the evil is so palpable here that we will need the best leaders to combat the human trafficking!**

Free Methodist churches are serving in slums, on the margins, and at the market. All these kids are so vulnerable! ICCM's project is making a *huge* difference in the lives of the children and the community. Not only is there outreach in the market, but our leaders network with community leaders and schools to insure health, safety, and educational opportunities for these children. Holistic ministry! Creating new futures! This is it!
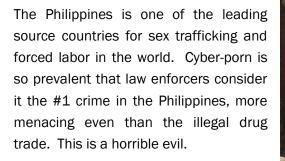

Kevin enjoying Project Transformers kids.

The Philippines is one of the leading source countries for sex trafficking and forced labor in the world. Cyber-porn is so prevalent that law enforcers consider it the #1 crime in the Philippines, more menacing even than the illegal drug trade. This is a horrible evil.

In the midst of this exploitation and abuse of innocent children, Kamuning Free Methodist Church in Quezon City, Manila, carries on an outreach ministry of love and empowerment for children in the public market. At right you can see children posting their "shields of faith" on their neighborhood wall. God's love for these children compels church leaders to pour their time and resources into reaching, teaching, feeding, discipling, and protecting these precious kids. By sponsoring one of the 50 children or giving to ICCM's "Project Transformers" you can help these children to be equipped with all God's armor to help them stand firm in the battle for their bodies and souls. Please pray for the children of The Philippines!
