

Light and Life FM School has had many activities this year, activities that have brought joy, fun and learning experiences to the kids. It has been amazing to see the contentment of every kid while learning and getting to understand different things through these projects.

In the end-of-year ceremony, they were able to present and show some of the things they learned. We had activities focused on character traits called *"Cultivating and Applying Values for a Comprehensive Training"*, we also had a science fair called *"I Learn and Have Fun through Science"* in which students from 1st to 6th grade demonstrated their knowledge through the various topics presented. But there was one project called "Solidarity Does Not Go Out of Style" that really moved the hearts of the kids, and Lázaro wanted to share his experience with you.

- My name is Lázaro Silva. I am 12 years old and I live in the Mburika neighborhood, Ventura section of the city of Cambyreta in the department of Itapúa, Paraguay.

I attend the meetings of the House of Peace (Community Church Planting) that operates in the neighborhood and I am learning a lot about the love of Jesus. I made the decision to get baptized and follow Jesus a year ago at the Light and Life FMC in Encarnación.

This year the Lord put together for me and many children, a team of people who with so much love and patience guide us in the knowledge of His ways. Students of the Light and Life FM School sent us a donation of clothes, shoes and toys that were very useful for me and for many children. Thanks to the Project "Solidarity Does Not Go Out of Style"

implemented by the students, teachers and directors of Light and Life FM school, I was able to learn the importance of giving and be grateful for what God gives us, knowing that he takes care of us at all times. I was so happy to see my friends and families in my neighborhood happy with what we have received.
